

Virginian AE 2-10-10-2

Virginian AE 2-10-10-2

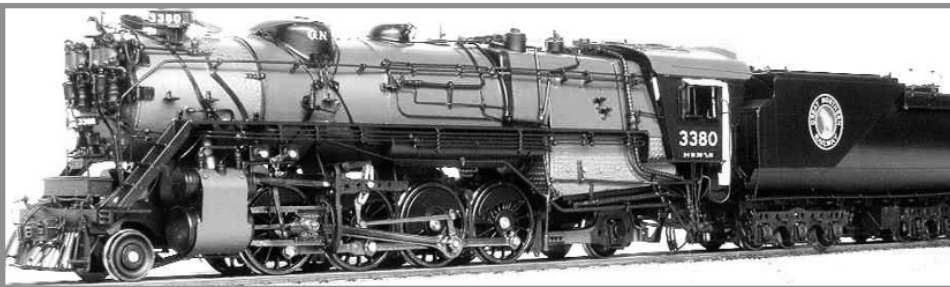

These ten locomotives were built in 1918 by ALCO for the Virginian Railway and were in service into the 1950s. Due to size limitations en route, the locomotives were delivered without cab or the front, low pressure cylinders, which were installed on site. The low pressure cylinders at 48 inch (1.22 m) diameter were the largest ever used on a US locomotive; they had to be tilted slightly upward to provide sufficient clearance. Only 60 2R and 60 3R models to be made. Reserve Yours Today!

Erie S-3 and S-4 Berkshires

The Baldwin Locomotive Works received an order for fifty-five "Berkshires" from the Erie in 1928. The last group of 20 was designated as Class S-4 and carried road numbers 3385 through 3404.

Also coming are the Erie Cabooses.

Great Northern O-8 Mikado

Great Northern started by converting M-2 2-6-8-0s to O-7 Mikados, changing the boiler made them O-8s, This final configuration was very successful for the Great Northern. Notice the dual airpumps on the smoke box front. Glacier Green Boiler. Choose from Open or Closed Cab Configurations

Stunning... Reserve yours today.

NP W-3 and W-5 SUPER Mikado

There were 5 classes of Mikados on the GN, the W-5 was the biggest, heaviest and badest with the big Elesco FWH on the top of the smoke box. Majestic!!!

Coming Soon

Great Northern M-2 2-6-8-0: Great Northern also rebuilt this Mallet into a simple articulated in the 1930s. The M-2 was at home hauling freight and coal. A very distinctive model in Glacier Park green. Coming April 10.
N&W K-2a Streamline Mountain: At first glance you might think it was a J, but it ain't. Why is this locomotive so important, because it was important to the N&W. There were 12 of these modified K-2s. They were used frequently on the N&W. And now for the first time in O Scale, you too can run one. Coming May 2010.
